(PRE-REQ) Pre-requisite: Indicates a course that must be successfully completed before enrolling in other course as indicated.

(CO-REQ) Co-requisite: Indicates a course which must be taken no later than the same semester as the course described.
All nursing clinical courses must be taken concurrently with the corresponding nursing theory course.

Progression Policy: The Associate of Science in Nursing curriculum is designed to continually build upon knowledge and skills gained over the course of the program. Therefore, nursing students must achieve an overall minimum grade of "C" (2.00 grade point equivalent) in their major, math, and science courses in order to ensure progression in their program. A student must complete prerequisite courses successfully in order to enroll in subsequent courses.

Nursing Curriculum Realignment: The curriculum plan shown represents a curriculum realignment approved by the Ohio Board of Nursing on 7/29/10 and effective for all new students enrolling in Fall 2011 and beyond. Students who were enrolled prior to Fall 2011 were given the option of following the realigned curriculum or remaining in the old curriculum. Students who remained in the old curriculum are required to complete their degree by Fall 2012 or move to the realigned curriculum. For more information, please contact the Academic Advisor.
