

AULTMAN COLLEGE

Acknowledgement of Consequences for COVID-19 Vaccination Declination

APPLICABLE FOR THE SPRING 2022 SEMESTER ONLY

Aultman College participates in a myriad of clinical programs to support student progress through coursework. The clinical programs are required components to many of our programs.

Beginning with the Spring 2022 semester, students are on notice that COVID-19 vaccines may be mandated for many clinical programs, and accommodations will be available only to the extent permitted by the clinical site. Unvaccinated students could be subject to the consequences below:

- Denial of clinical site or Aultman College campus access
- Failure to progress in current program
- Loss of financial investment (refer to Tuition and Fee Refund Policy)

Current approved medical or religious exemptions may not be accepted by the clinical site, which may result in the consequences listed above.

Your signature below acknowledges that you understand these implications of not receiving the COVID-19 vaccine.
